

DIABETIC'S - BLUE

EB14.017

The compact yet perfectly sized Elite DIABETIC'S isothermal kit bag is cleverly designed to divide into two pockets. One pocket is lined with isothermal materials and ideally sized to store insulin vials or pens, along with a gel cool pack (such as the Elite [Gel](#)). The second features a mesh fronted pocket and a variety of elasticated retainers designed to hold specific materials to treat diabetes, for example, a glucometer, test strip bottle and insulin pen. Available in a range of colours, this stylish purse sized cool bag is easy to slip into a handbag or backpack, ensuring all the necessary medical accessories are at hand and stored at an optimal temperature.

Features

- Duel pocket design separates isothermal insulin compartment and those pockets designed for diabetes management equipment.
- Internal mesh pocket allows for materials to be stored while providing full view into the still closed compartment.
- Elasticated retainers to secure, test strip bottle, insulin pens and glucometer (with screen protector).
- External flat pocket for cards and personal affects.
- Large zip pull tabs for easy opening.
