

DIA'S COOL - BLUE

EB14.026

This isothermal bag has been specially designed to carry all the injection pens and the essential items for diabetes treatment. Its design is split into two pockets: the front pocket is designed to hold your meter and testing equipment, test strips and extra needles. The back pocket will hold both the included pouch of cold gel along with your injection pens. It has an isothermal lining to make sure that it maintain constant temperature.

Features

- Front pocket to hold your meter and testing equipment, test strips and extra needles.
- Back pocket to hold both the pouch of cold gel and injection pens.
- Insulating lining to maintain constant temperature.
- Transparent PVC pocket on the back to hold extra material or personal belongings.
