

## GLOVECLIP - BLACK

### EB09.075

This glove holder has been specifically designed to allow the user to secure gloves of all shapes and sizes, or rope if preferred, to body vests, belts or packs. Utilising the universal molle anchorage system, it can be attached vertically or horizontally as required. A carabiner allows keys, touches, knives or other such accessories, to be easily clipped to the unit.

### Features

- Built using tough polypropylene strapping, the glove holder can be adjusted via velcro compression fasteners that then hold the contents secure, no matter the size or shape of glove used.
- This versatile accessory can be also used to secure lengths of rope or other similar items to packs, belts, vests or any other product supporting the universal MOLLE anchorage system.
- The item can be attached in either a vertical or horizontal orientation.

### Technical data

|                     |               |
|---------------------|---------------|
