

KIDLE

EB02.013

The Elite KIDLE is a highly versatile first-aid kit pack with removable and adjustable strapping that allows for the pack to be secured around the leg, waist or to the front or side of other backpacks that feature the MOLLE universal fastening system. It can also be simply handheld. This compact pack has been specifically designed with emergency first responders in mind. Its small size and options for fastening to different parts of the body make this ideal for early interventions. Fast access top pocket, glow-in-the-dark rope zip tabs, internal elasticated securing straps and pocket with buckle for stowing scissors, are but some of the many clever design features presented by this ingenious accessory bag.

Features

- Easy access top pocket and fast opening, water-resistant zip with additional security velcro tab.
- Compartment for clothes-scissors with quick-release buckle.
- MOLLE system with PALS strapping on back panel for securing to larger backpacks.
- Internal elasticated straps ensuring items are held securely and remain organised.
- Waist and leg strap options.
- External flat pocket.
- Reflective, water-resistant zip with glow-in-dark rope tabs.
